CEI just granted us permission to attach to the poles in University Heights. We will have crews beginning to hang strand tomorrow. The first streets we will be working on will be Hadleigh, Kerwick, S Belvoir and Carroll. By Monday the 12th there will be five aerial crews working within the city. The easements we will be working on will be Warrensville Center west to Charney with Hillbrook as the northern border. All of the streets were door hung in the last week of June in preparation for the construction to commence.

We are excited to finally get the construction crews in action. Please contact me with any questions or concerns.

Regards,

Kirk
