Mayor Infield addressed the thoughts of various residents that the building could be used for other purposes. Mayor Infield stated that Park Committee discussed what to do with the building at their last meeting and has not able to come to a condenses as to what to do with the building.

Service Director Jeffrey Pokorny noted that the building is in disrepair and because of the asbestos it would take a tremendous amount of work to bring the building to code and to renovate it. Mr. Pokorny also mentioned that the building has no historical value.

Councilman Sims gave the background on what occurred when Council began to considered inquiring the building Council recognized cost would be inquired beyond the cost to acquire it. Council also recognized that the building could not just sit as it would become a hazard to the community. As well Council recognized that in order to use the building there needed to be a purpose and currently there is no purpose. In addition, if there was a purpose that would also be ongoing cost to operate the building. Mr. Sims remarked that this is an investment and that there isn’t a park facility located in University Heights. A park could serve not just as a great utility but also increase the prices of the homes in that general area and possibly increase the value of the homes in that community.

Councilman Sims stated his hopes that the Park Committee can present a plan that is acceptable to City Council or a plan that is acceptable to the community over all as to how the city develops the park along with it’s amenities. In the long run the hope is that this investment will prove beneficial to the city over the long run.

Mayor Infield thanked Councilman Sims for summarizing the process and also noted that it is both her’s and City Council’s vision to offer an recreation option that is not currently available to the community.

Mr. Luschek, 3697 Washington spoke of his concerns in regards to how the property was purchase of the property and the use of it as a park. What type of park would it be, passive or active and can it be a pocket park on one end and have homes at the other end?

The Facilities Lay Committee is asking for a vote of confidence in a plan (which could change) to be able to capture a rebate one the cost of the construction (14% of the cost). It appears that one of the plans would be presented to the community and the community would be asked to vote. However, there’s no guarantee that the plan voted on will be what is built. The district receive’s 14% rebate of the construction cost but that may not be available for approximately 12 years.

Councilman Wiseman asked if University Heights could ask the School Board’s Facilities Lay Committee to a City Council meeting to speak and to answer questions from Council and concerned residents. Mayor Infield stated that was a good idea.
