Kitchen Remodel

Required Application Information

- Floor plan drawn to scale showing existing conditions and proposed changes. Plan must include dimensions, electrical outlets, lights and switches.
- Dimensions must include ceiling height.
- Window location(s) must be included in the plan.
- Show the location of all appliances (stove, microwave, dishwasher, disposal, refrigerator, sink etc.)
- Show location of counter top and cabinets.
- Include any walls being removed or added and materials to be used. Also indicate if the walls are load bearing.
- Provide framing details if structural alterations are proposed.
- Show outside walls as insulated: indicate R-value.
- A garbage disposal is required when doing a kitchen remodel.
- Three sets of plans are required for both residential and commercial projects.

Electrical Specifications

- When doing a kitchen remodel an upgrade in electrical is required.
- Two small appliance circuits are required with no more than four outlets on a line.
- Stove and microwave may be on one circuit.
- Disposal and dishwasher may be on a circuit.
- The refrigerator may require an individual circuit.
- Three-way light switch(es) may be necessary depending on the size of the room
